

## "WHAT OUR NEIGHBORS ARE DOING."

Here is what one man from Texas says. Seven months ago my crops burned up pretty badly and what the sun didn't finish the water and floods wiped out for me.

I, therefore, made nothing from my crops, but I had three dairy cows and I was putting cream on the market every day, and I managed to keep my head above with those three dairy cows.

I went to the bank, who was mighty close handed, and wanted to borrow some money, and \$300.00 was the limit. After I got the \$300.00 I went back home to my wife and talked over the best way to invest this amount. She said, never mind the crops, we will run the crops as a side issue, but don't invest this money in the crops, but go out and buy five more dairy cows and a cream separator. So I went to the store and bought a Sharples Tubular Separator for \$55.00 and bought five cows some for \$40.00 and some for \$60.00 and they averaged \$250.00 for the five, then I had eight cows and a cream separator, and I put on the market enough cream in seven months time to pay off the \$300.00 I borrowed and I owned the eight cows, a cream separator and had made some money besides, and I am only on a small scale as you can see, but I have hogs on the side and feed them the skimmed milk. I propose to stick to the dairy business."

Now this is only one man in a thousand that is making money in the dairy business. He had to pay cash for his separator, and sell his cream at the market price. Now we are going to help you get started in this paying business. We will sell you a Sharples Tubular Separator at the cash price, and give you until September to pay for it. Furthermore, we will pay one-half cent per pound above the market price for your cream while you are paying for the separator. Come in and let us talk it over.

Yours to be helpful,

KENNA LUMBER COMPANY.

#### On His Desk.

The ink called the blotter an old soak, then the fight started. The ruler got her foot in it, inch by inch, and, instead of helping her out, the stamps stuck to the envelopes and let the pen holder. The keys were in a bunch, so the pencil lead them away and let the paper weight.

At this stage of the battle the paper knife stepped in, cut out the fight, and silence reigned supreme.—Judge.

#### Thirst for Novelties.

The curse of modern life—the thirst for the new, the rage to get out of the old skin—is the blight on our literature, our art, our drama, our manners—even our morals. It is passion with out aim, or conviction, or feeling—a mere restless itch to get free from old habits and to get into something uncommon. It hardly matters what, if only it can announce itself as "unconventional."

## How to Live 100 Years

Is the Name of a New Book

Eugene Christian, F. S. D., the world's greatest Food Scientist, has just published a new book called "How to Live 100 Years."

This book tells you what to eat according to your age, your work and the time of the year. It teaches you how to select, how to combine and how to proportion your food at meals so as to establish perfect digestion and assimilation of food and perfect elimination of waste. In other words, it teaches you how to cure all stomach and intestinal disorders by removing their causes, which is wrong eating.

If you have indigestion, gas, fermentation, sour stomach or any such disorders after a meal, this book tells you how to put the remedy on your table at the next meal.

Dr. Christian shows that all animals except man live about eight times as long as it takes them to get their growth. If man should do this he would live nearly 200 years, but civilized man dies at the average age of 39. He begins to lose his teeth, his eyes and his hair, and drops into his grave only a few years after he is grown.

Dr. Christian shows that 32 per cent of all the human beings born into the world die before they are one year old. 25 per cent more die before their fifth birthday, and more than half of the human race die before they are twenty-five.

All other animals on the globe live eight times as long as it takes them to get their growth. Man breathes the same air, drinks the same water, lives under the same sunshine, but differs from his brother animals only in his eating, therefore Dr. Christian shows conclusively that this appalling discrepancy must be on account of his eating habits and he has proved that his theory is true by curing over 23,000 people within the past ten years by teaching them what to eat and how to eat. "How to Live 100 Years" gives the secret of his methods.

This book does not disarrange or upset the family table. It teaches the housewife what foods the meal should be composed of, so as to make them chemically harmonious and perfectly digestible and healthy.

This book is beautifully bound in vellum, and gold lettered. Send one dollar to Dr. Eugene Christian, 213 West 79th Street, New York City, and you will receive this life saving book by return mail, and if it is not worth its weight in gold your money will be promptly refunded to you.
